A DISCOVERY OF THE UNIMAGINABLE.

Cruising in the Antarctic has a lot to do with experience and intuition: at Hapag-Lloyd Cruises, we know the way to the wonders of the Antarctic. We have been travelling to the southern polar region for more than 30 years. Our teams all have polar experience and some have journeyed to the Antarctic over 100 times. All our Antarctic cruises take place in the austral summer. In December, it almost seems like the remote region is waking up from hibernation just for you. Penguins return from the sea to their breeding ground, mate and build

nests. Fresh powder snow covers the landscape and the ice is immaculate. It is light for up to 24 hours. Between January and March, particularly fantastic passages are possible, with good chances of whale watching. Penguin chicks fledge and the Antarctic comes to life. Whether early or late – let yourself be intoxicated on our expeditions by an almost unearthly beautiful region dominated by wildlife: penguins in huge colonies, mighty elephant seals and whales as well as many species of seabird.
